

Munro Stainless Steel Basket Strainers – 2" and 3"

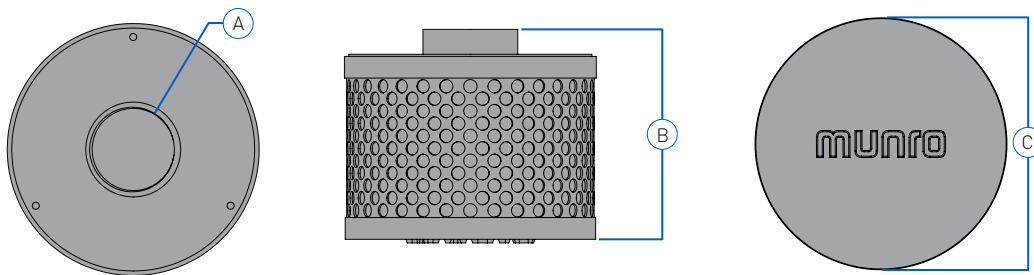

These basket strainers are comprised of 1/8" holes which efficiently strain water for most centrifugal lawn pumps. Constructed of high tensile stainless steel, these strainers are built to withstand harsh conditions.

- 1/8" mesh will only allow passage of particulate that will flow through most pump impellers – greatly reducing the chance of clogging pumps or other devices
- Stainless steel for longer life in challenging water conditions
- Female NPT connection

ADVANTAGES

- Very low input velocities which help to reduce particulate accumulation on the outside of the strainer
- Long-lasting stainless steel construction
- Excellent crush and abrasion resistance

Dimensions

A	B	C	Model Number
2" NPT	5.83"	7"	MBSA2
3" NPT	6.08"		MBSA3

Specifications

Solids Handling in	Approx. Weight lbs	Description	Model Number
1/8 Holes = 6 Mesh	2.9	Munro 1/8" SS Basket Strainer 2"	MBSA2
	3.25	Munro 1/8" SS Basket Strainer 3"	MBSA3
