

### Complete PRO II — *on demand!*

#### The easiest installation is now available with on demand controls

The Munro Complete PRO II is already the total package, complete with a professional grade pump, the highest quality pump control, and simplified plumbing connections, all housed in a unique enclosure designed specifically for a pump.

Now, the Complete PRO II is available with our Pressure Start Control Box. Grab your hose and water your plants or wash down the driveway. The pump will automatically run on your demand for water. No need for a pressure tank! On demand controls utilizes flow and pressure to detect water demand.

#### Features and Benefits

- Does not require a pressure tank
- Check valve included on discharge, to avoid cycling
- Constant pressure available at 50 PSI down stream with various system flow rates
- Choose from 110 volt or 220 volt
- Low 24 volts to external switches
- Comes fully plumbed, including Pressure and Flow switches, for ease of installation

**NOTE:** A water tight system is required. Air leaks in the system will cause the pump to short cycle.

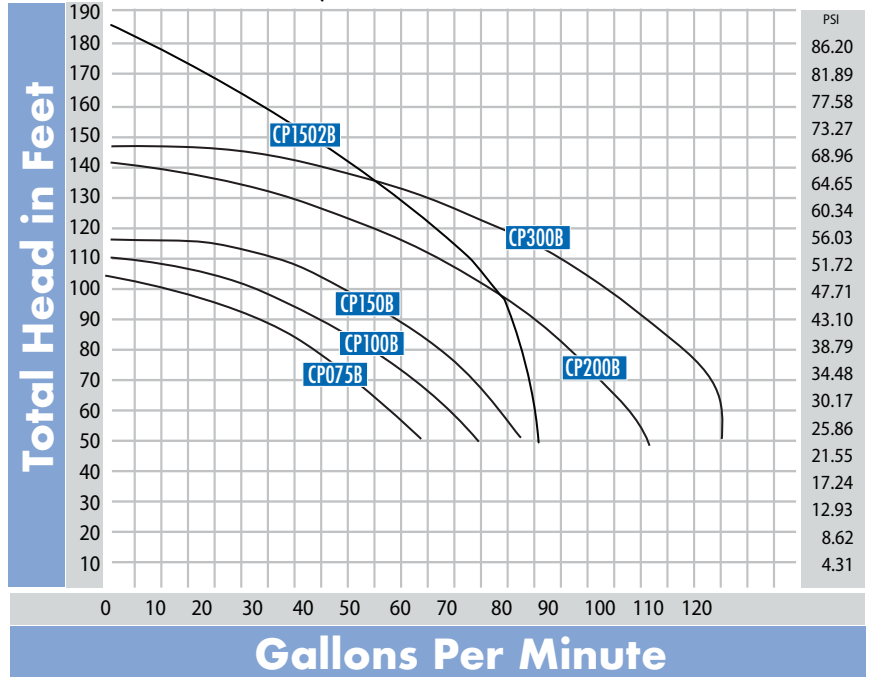

**Easiest to select & specify** – One professional package includes pump, smart controls and enclosure.

**Trouble-free components** – High quality materials for a clean, durable installation you will be proud of.

**Hassle-free installation** – Comes complete. No parts to forget, no need for shortcuts. No fuss, no errors.

**2-year warranty** – Upgrade to the Complete PRO II and your warranty goes from 1-year to 2-years.

HORSEPOWER RANGE: 3/4 - 3
