

# The Irrigation Pump Built to Last

## Munro LP Series | 3/4 HP - 5 HP

- **OUTPERFORM**  
With higher GPM to HP ratios, Munro pumps outperform common competitor units, time after time.
- **OUTLAST**  
A cast iron body and diffuser, brass (never plastic) impeller, stainless steel wear ring and standard (not a costly upgrade) silicon carbide seal make Munro pumps longer lasting.
- **EASIEST**  
Easy installation and simple maintenance with two priming ports, a sensor port and dual chamber drain valves.

- 1 BRASS IMPELLER**  
Longest life in its class. Offers greatest durability and reduces costly maintenance vs. common plastic impellers.
- 2 BUILT-IN PRIMING & DRAIN PORTS**  
For start-up and maintenance convenience.
- 3 CAST IRON CONSTRUCTION**  
Designed for long-term performance. No plastic case to warp or crack.
- 4 SENSOR PORT**  
Allows temperature monitoring to avoid costly maintenance.

- 5 SILICON CARBIDE SEAL**  
Proven tough to last longer.
- 6 CAST IRON DIFFUSER**  
Assures durability for the life of the pump.
- 7 STAINLESS STEEL WEAR RING**  
Reduces springtime oxidation and impeller friction.
- 8 STAINLESS STEEL BOLTS**  
No more "busting knuckles" to remove bolts.
- 9 STEEL BASE PLATE**  
Easiest, most stable mounting, with four bolt holes.
